

Inaaya Khan

8085801106 | inaayahbdo@gmail.com | [Linkedin-Inaaya Khan](#) | [Github](#) | [Leetcode](#)

Enthusiastic fresher with a passion for building impactful tech solutions using modern web technologies. Inclined towards developing projects by integrating security based solutions and AI tools in the development process. Seeking an opportunity to apply skills, grow professionally, and deliver value to an organization.

EDUCATION

Btech Cse (3rd year), Maulana Azad National Institute of Technology, Bhopal, MP [CGPA:7.71]

Higher secondary education: Indian Public High School, Ras al Khaimah, UAE

PROJECTS

AI-Powered Resume Builder

HTML, CSS5, JavaScript, Django, Google Gemini AI, WeasyPrint

- Developed an AI-integrated Resume Builder with secure user authentication and profile management.
- Implemented a multi-section editor covering work experience, education, skills, and projects with dynamic form handling.
- Integrated Gemini AI to generate professional, ATS-optimized key points in real time and designed customizable templates with one-click PDF export for pixel-perfect resumes.
- Enabled cloud-based media storage for reliable access and seamless user interface experience.

IntegrityX - File Integrity Checker

Python, SQLite3, Streamlit, SHA-256, Cryptographic hashing (hashlib)

- Designed and implemented a cryptographic tamper-detection system using secure hashing algorithms to instantly detect unauthorized file modifications, injections, or deletions.
- Built a lightweight database system with SQLite3 to store, index, and cross-reference file baselines with minimal system overhead.
- Developed an interactive, real-time user interface using Streamlit to visualize system integrity health, display instant alerts and warnings.
- Engineered an automated directory scanning engine using os.walk to efficiently baseline, parse, and monitor complex file hierarchies.

EXPERIENCE

Smart India Hackathon, 2025

Participant, Team ALGORYTHM

- Designed and developed an intelligent internship matching platform that bridges the gap between student talent and employers by ingesting multi-layered data like resumes, portfolios, and job requirements.
- Engineered a secure ingestion layer that automatically validates user consent and protects private data before accepting any personal information.
- Implemented a background worker queue to handle asynchronous, heavy tasks like deep resume parsing and data embedding without slowing down the user experience.

CERTIFICATIONS

Google Professional Cybersecurity Certificate, March 31, 2026

Gained hands-on experience in identifying vulnerabilities, managing risks using NIST framework and utilising tools like Python, SQL and Linux to strengthen digital defenses.

SKILLS

Languages/ Frameworks: Python, C++, C, HTML, CSS, Streamlit, Django, hashlib, React, Tailwind CSS

Databases: SQL, SQLite3, Git

Core domains: Data Structures and Algorithms, Secure Software Development, Cryptographic hashing
